

OPEN DISCLOSURE

Park High School

Course: Pre Calculus

Teacher: Mr. Gannon

OBJECTIVES / TARGETS:

- Graphs; various and numerous
- Functions: polynomial, power, rational, exponential, logistic, logarithmic, trigonometric
- Trigonometry: analytical, applications
- Systems and matrices

MATERIALS to be supplied (daily) by student:

- **Notebook**: any flavor that works for you, I highly suggest a 3 ring.
- **Pencil** or pen as long as it is legible for me.
- **Scientific calculator**: calculators are not only encouraged, but expected. I recommend a calculator that offers a two-line display so you can see what you entered, and the answer the calculator provides. Look into getting a graphing calculator for yourself; it will benefit you through many years of math and science.

- **Textbook cover**: Texts must be covered immediately. Students will be fined for any damage that occurs to the textbook during the school year.
