

Return to School/Work Criteria

From the CDC:

I think or know I had COVID-19, and I had symptoms

You can be with others after

- At least 10 days since symptoms first appeared **and**
- At least 24 hours with no fever without fever-reducing medication **and**
- Symptoms have improved

I tested positive for COVID-19 but had no symptoms

If you continue to have no symptoms, you can be with others after:

- 10 days have passed since test

Depending on your healthcare provider's advice and availability of testing, you might get tested to see if you still have COVID-19. If you will be tested, you can be around others after you receive two negative test results in a row, at least 24 hours apart.

For Anyone Who Has Been Around a Person with COVID-19

It is important to remember that anyone who has close contact with someone with COVID-19 should stay home for 14 days **after exposure** based on the time it takes to develop illness.

I had symptoms of a viral infection and saw my healthcare provider. I was tested for COVID-19 and it was negative.

Students and staff who have received a negative test result should be allowed to return to school/work once their symptoms have otherwise improved in accordance with existing school illness management policies. They must be fever free for 24 hours without fever reducing medication and symptoms have improved.
